

Jumping Committee Summary of Business May 7th, 2024

The EV Jumping committee met on May 7th, 2024, and is pleased to submit the following summary of business.

Show Jumpers Ball 2024/Mini Comp	<i>Jumping Victoria, faced with the cancellation of the upcoming showjumpers ball, is exploring the feasibility of organizing a mini competition as a gesture of support and appreciation for its members. This initiative suggests a proactive approach to maintaining engagement and fostering community spirit within the organization despite unforeseen setbacks. The logistics of such an event, including venue arrangements, participant registration, and event promotion, will likely be key considerations in its successful execution.</i>
Annual Awards Venue	<i>Equestrian Victoria is currently deliberating between two potential venues for its upcoming annual awards night: Essendon Fields and the CBD. Essendon Fields, located near DFO, offers a hotel venue with various perks including discounted accommodation, full-service amenities such as three-course meals and sweets, a bar, spacious facilities, and ample outdoor car parking space to accommodate attendees. On the other hand, the CBD option would likely involve accommodations outside the venue, a cocktail/canapé style setup, underground parking with paid options nearby, and the advantage of a central location. The decision will likely hinge on factors such as attendee convenience, ambiance preferences, and budget considerations.</i>
Entry Check and Results Procedures	<i>Equestrian Victoria presented a flow chart outlining entry check and result procedures, identifying challenges in error handling, and emphasizing the importance of improvement. Proposed enhanced communication regarding entry check errors to ensure accurate participant information. Discussions ensued regarding the relevance of collecting and disseminating results, particularly given digital platforms' availability. Equipe's streamlined process was noted as a potential model for simplifying the task for event organizers. This suggests a proactive approach to optimizing procedures and leveraging technology to enhance efficiency in managing event logistics and participant information.</i>
Young Ambassador Program	<i>The Young Ambassador finalists have been fulfilling their obligations outlined in the program agreement by volunteering at major events. The finishing touches are being made for the upcoming leadership workshop and July training weekend.</i>
